DESCRIPTION
Radio magnetic indicator is a multipurpose instrument that indicates the magnetic heading and magnetic bearing of two radio stations such as VOR and TACAN. It may be coupled to a data transmitter without any affect on other signals throughout the system.

TOLERANCES
Card and pointers +/- 1 degree

SPECIFICATIONS
- Compass card and pointers are driven directly by synchro receivers.
- Unit is hermetically sealed to assure maximum reliability under extreme environmental conditions.
- Weight: 1lb 12 oz
